6. TOXICOLOGY AND HEALTH DATA

Specific Hazard:	No acute or chronic hazards or effects are known.
Medical Conditions:	
Aggravated by Exposure:	Some individuals with specific sensitivities may exhibit eye, nose, throat or thermal irritation with prolonged exposure to processing fumes or vapors.
Routes of Exposure:	Eye Contact: Not a probable route of exposure. Particulates may scratch eye surface or cause irritation. Skin Contact: A single prolonged exposure is not likely to result in material being absorbed through the skin in harmful amounts. Repeated prolonged exposure may cause mild skin irritation in some individuals. Exposure to hot material may cause thermal burns. Ingestion: Not a probable route of exposure. Inhalation: Not a probable route of exposure under conditions of normal use. Hot fumes or vapors which may form during processing can cause irritation to the respiratory tract.
Toxicology Information:	LD50 = NE; LC50 = NA Reproductive Effects: None reported Tetragenicity: None reported Mutagenicity: None reported Carcinogenicity: None reported

7. PROTECTIVE AND PREVENTIVE MEASURES

Personal Protective Equipment:	Eye: Wear safety glasses. Skin: Wear clothing appropriate to prevent skin contact. Where contact may occur with hot material, wear thermal resistant gloves, arm protection, and a face shield. Respiratory: Not normally required at ambient temperatures. If processing in area where ventilation is inadequate, wear a NIOSH approved organic vapor respirator with mechanical filtration.
Handling Procedures and Equipment:	Avoid skin and eye contact, practice good personal hygiene. Avoid inhalation of fumes/vapors from hot rubbers, compounds and vulcanizates.
Engineering Controls:	Local exhaust ventilation is recommended during all hot processing operations. NA

8. EMERGENCY AND FIRST AID PROCEDURES

Eye Contact:	Remove as for any foreign object. Flush with clean water for 15 minutes. Obtain medical attention if irritation persists.
Skin Contact:	Wash with soap and water. If thermal irritation, flush affected area with cold water to dissipate heat, then cover with clean cotton sheeting or gauze and get prompt medical attention.
Inhalation:	If fumes/vapors are inhaled, move to fresh air, aid breathing if necessary. Obtain medical attention if irritation persists.
Ingestion:	Unlikely to occur.

9. CHEMICAL REACTIVITY

Chemical Stability:	Product is stable at ambient temperature and pressure.
Conditions to Avoid:	High temperatures, 300-350 °C (572-662 °F) will cause thermal decomposition; ignition source.
Incompatibility with other Materials:	None known.
Hazardous Decomposition Products:	Carbon monoxide, carbon dioxide, various hydrocarbons, and products from incomplete combustion.
Hazardous Polymerization:	Will not occur.
