

## Product Data Sheet

### Admex 523 Polymeric Plasticizer

#### Product Description

Admex 523 is a medium molecular weight polymeric plasticizer that is characterized by a mild ester odor and light color. It imparts excellent processability to PVC compositions. It also has high gel strength, low fusion temperatures and excellent cell structure.

#### Typical Properties

Appearance	Clear, viscous liquid
Boiling Point @ 5 mm Hg	>315.56°C
Color	
APHA	100
Gardner	1
Flash Point COC	238°C
Odor	Slight ester-like
Pour point	-9°C
Refractive Index @ 25°C	1.514
Solubility in Water	Slightly soluble
Specific Gravity @ 25°C/25°C	1.100
Vapor Pressure @ 20°C	<0.001 mm Hg
Viscosity, Brookfield @ 25°C	4400 cP
Viscosity, Kinematic @ 99°C	35 cSt
