PROPERTIES

Ultra-accelerator for NR and synthetic rubbers. General purpose accelerator for NR latex. Safest of all zinc dithiocarbamates.

 $\mathsf{Ekaland^{\intercal M}}$ ZBEC is often used as a secondary accelerator with thiazoles.

Ekaland[™] ZBEC has to be used with sulfur and zinc oxide.

 $\mathsf{Ekaland^{\mathsf{TM}}}$ ZBEC disperses easily in dry rubber. It does not affect latex stability.

In wet rubber, gives an excellent prevulcanization resistance.

In association with HTS or VULTAC®, Ekaland[™] ZBEC improves antireversant effect. For compound containing a high level of silica, Ekaland[™] ZBEC improves filler-rubber bound.

Non-colouring and non-staining. Odourless.

APPLICATIONS

General rubber goods: latex articles, dispersions, adhesives, wire and cable, extruded sealing profiles, etc.

PACKAGING & STORAGE

Paper bag weight: 15 kg net Standard CP1 pallet: 300 kg net

Shelf-life : 2 years in its original packaging

Store in a dry and cool place and away from direct sources of heat or sunlight.

SAFETY & TOXICITY

For detailed information, please refer to our Material Safety Data Sheet.

Nitrosamine FREE

ZBEC is also available in masterbatch form, under the MIXLAND+[®] brand name, offering a reduction of industrial hygiene problems and different technical benefits.
