ZnO

Vulcanisation activator, nitrosamine free

vuicanisation activator, nitrosamme nee							
PROPERTIES: ZnO is a highly effective vulcanisation activate use in NR, SR and latex. As the loading is increased the activity of the vulcanisation system and the despite of crosslinking are increased. Zinc oxide ZnO M.W: 84 CAS: 1314-13-2 EINECS: 215-22-5 R It is also used as light-coloured reinforcing filler. It is recommended for all conventional acceles systems, slightly retarding alkaline types. In vulcanisation, it exhibits anti-scorch propegives good processing, low heat build-up and vector from slow to fast curing, depending on impurpresent. It's a curing agent also in addition with MgO for the vulcanisation activate use in NR, SR and latex. As the loading is increased. It is also used as light-coloured reinforcing filler. It is recommended for all conventional acceles systems, slightly retarding alkaline types. In vulcanisation, it exhibits anti-scorch propegives good processing, low heat build-up and vector from slow to fast curing, depending on impurpresent. It's a curing agent also in addition with MgO for the vulcanisation activate use in NR, SR and latex. As the loading is increate the activity of the vulcanisation system and the despite of crosslinking are increased. It is also used as light-coloured reinforcing filler. It is recommended for all conventional acceles systems, slightly retarding alkaline types. In vulcanisation, it exhibits anti-scorch propegives good processing, low heat build-up and vector from slow to fast curing, depending on impurpresent.	ased, vulcanisates cured in hot air or with sulphenamides; egree rubbers cured with metallic oxides and without sulphur; food-contacting goods; latex and adhesive compounds. erator erties, varies urities						

M A	PRODUCT	Active Content (%)	Colour*	Filtration (microns)	Binder	Mooney ML (1+4) 80°C	Density Typical values
SIE	ZnO 80 GA F140	80	N (White to Yellowish)	140	E/AA	20	2.75

* N for natural or P for pigment

SAFETY & TOXICITY:

T

C

For detailed information, please refer to our Material Safety Data Sheet.

PACKAGING & STORAGE:

Cardboard box weight: 25 kg net.-CP3 pallet: 600 kg net. Do not pile more than 2 pallets height

Shelf-life: 2 years in its original packaging

Store in a dry and cool place and away from direct sources of heat or sunlight.

Compared to a traditional EVA/EP(D)M binder, MIXLAND+® allows:

- Dust free products with a high level of filtration up to 140 μ.
- Tack free products at room temperature.
- · Lower Mooney viscosity, improving quality of dispersion.
- Scrap rate reduction thanks to filtration.
- Wider compatibility with other elastomers.

GA: pellets on ethylene-alkyl-acrylate binder
