## DATA SHEET Sil EF189 DLC®

Sil EF189 DLC is a thiocarboxylate-functional silane absorbed on calcium silicate. Specially formulated for low emissions, it has application in sulfur-cure compounding with the ability to achieve excellent dynamic properties at low temperatures (-20°C to +5°C). Sil EF189 DLC can also be used in high temp mixing without causing viscosity increase or premature vulcanization. Reduces scorch when compared to other silanes.
