

Synpro® CALCIUM STEARATE 114-36

Lubricant Product Profile

Product Description

Synpro® CALCIUM STEARATE 114-36 is manufacture for those applications demanding a superior quality, clear melting grade of calcium stearate. The polyolefin industry, in particular, is characterized by such applications. By use of TYPE 114-36, build-up on extruder screen packs is minimized, resulting in longer runs and reduced down time.

Synpro® CALCIUM STEARATE 114-36 may be safely used as stabilizers in polymers used in the manufacture of components intended for holding food; according to the Food and Drug Administration's Code of Federal Regulations under Title 21, Parts 177.2600 and 178.2010.

Safety and Handling

Complete toxicity and handling information can be found on the Material Safety Data Sheet, which is available on request.

Typical Properties

% Ash	9.5
% Water soluble Salts	Nil
% Free Fatty Acid	0.2
% Moisture	2.5
Melting Point	155°C
Apparent Density	0.2 gm/cc

Fineness 100% Passing 200 Mesh
